

第23届世界土壤学大会
The 23rd World Congress of Soil Science

Abstract Submission Manual

(1) How to submit an abstract?

(2) Abstract Topics

Key dates

第23届世界土壤学大会
The 23rd World Congress of Soil Science

Submission Opens: Monday, July 7, 2025

Abstract Submission Deadline: Tuesday, December 23, 2025

Abstract Review: December 2025- February 2026

Abstract Results Notification: End of February 7, 2026

Early Bird Registration Deadline: Saturday, 7 March 2026

Soil and the Shared Future for Humanity

Notification

第23届世界土壤学大会
The 23rd World Congress of Soil Science

To enhance your conference experience, we have updated the abstract submission process in the conference system, offering you more flexible participation options. The key updates are as follows:

New abstract-first submission channel: You may now submit your abstract first and decide whether to register for the conference after the review results are announced next year. (Please follow the instructions starting from Step 7.)

Retained original registration channel: The original “register first, then submit abstract” procedure remains available. You may still choose to complete conference registration in advance as needed. (Please follow the instructions starting from Step 3.)

Both options are available for you to choose from based on your preference. The system will automatically link your abstract to your registration status accordingly. For detailed operational guidance, please visit the “Abstract Submission” page on the official conference website.

Thank you for your attention and participation. Should you have any questions regarding the process, please contact the conference team at wc2026.reg@issas.ac.cn.

Soil and the Shared Future for Humanity

How to submit an abstract?

第23届世界土壤学大会
The 23rd World Congress of Soil Science

Step 1: Read the Abstract Guideline on the congress website.

Abstract Guidelines

- (1) All abstracts must be written in English.
- (2) Abstracts can only be submitted online via the conference website. This is the ONLY option for abstract submission.
- (3) Define all abbreviations and concepts in your abstract at first use.
- (4) Abstracts must be received by the announced deadline (before December 23, 2025). Abstracts received after the deadline will not be considered.
- (5) All abstracts must be submitted and presented in clear English with accurate grammar and spelling.
- (6) The presenting author is required to ensure that all co-authors are aware of the content of the abstract before submission of the abstract.
- (7) Only abstracts for which presenting authors have paid the conference registration fees by May 7, 2026 will be included in the Scientific Program.
- (8) Please note, there is no fee or charge to submit an abstract.
- (9) All abstract submitters including presenting authors are expected to pay their own travel expenses and conference registration fee(s).
- (10) Instructions for preparation of presentations will be made available on the Congress website.

Guidelines for Submission

International participants

中国参会代表

Before you begin your abstract submission, please prepare the following information:

- (1) Presentation type
- (2) Abstract topic – select the topic per the list of session topics.
- (3) Presenting author's contact details: Name, Email address, Affiliation
- (4) Abstract text – limited to 3000 characters with spaces in total, this including Acknowledgments and References if any.

Abstract Template

 *Please Note: All Presentations are intended to be given in person, onsite, in Nanjing.*

You will receive a confirmation email after you have submitted your abstract. Please contact us by the email wcss2026@issas.ac.cn if you have not received confirmation that your abstract has been submitted.

Soil and the Shared Future for Humanity

How to submit an abstract?

第23届世界土壤学大会
The 23rd World Congress of Soil Science

Step 2: Go to the WCSS2026 registration portal and log-in or sign-up.

The 23rd World Congress of Soil Science

Soil and the Shared Future for Humanity

JUNE 7–12, 2026 Nanjing · China

[Back to Congress Website](#)

Esteemed participants:

This platform serves as the delegate registration portal for the World Congress of Soil Science 2026.

Registration Steps

- Every delegate need create an account before logging in. If you do not possess an account, kindly create one by clicking on the button "Create an Online Account".
- If you have registered an account, please login in with the email and password, and do not register an account twice.

Registration Inquiries

Should you encounter any difficulties during the registration process, please contact us at the email: wcsc2026.reg@issas.ac.cn.

Official Contact Emails

General Information & Abstract Submission Enquiries: wcsc2026@issas.ac.cn

Registration Enquiries: wcsc2026.reg@issas.ac.cn

Note

Category (In-person)	Early bird deadline by March 7, 2026	Regular deadline From March 8 to May 7, 2026	Onsite deadline From May 8, 2026
Standard	\$ 600 ¥ 3,500	\$ 700 ¥ 4,000	\$ 800 ¥ 4,500
SSSC member (Student Membership not included)	\$ 570 ¥ 3,300	\$ 670 ¥ 3,800	\$ 770 ¥ 4,300
Student Participants from low, lower-middle income countries (China not included) Farmer	\$ 400 ¥ 2,500	\$ 500 ¥ 3,000	\$ 600 ¥ 3,500
Companion	\$ 300 ¥ 1,800	\$ 300 ¥ 1,800	\$ 300 ¥ 1,800
Gala dinner		\$ 100 ¥ 600	

(1) Low, lower-middle income countries list (China not included): (source: World Bank)
Link: <https://datatopics.worldbank.org/world-development-indicators/the-world-by-income-and-region.html>

(2) Students/SSSC Members/Farmers are requested to submit a valid identify document to verify their status on the registration system.

(3) Accompanying person registration is only available for the family members of a delegate. It ONLY allows access to social event, welcome reception, and exhibition hall. (Access to congress rooms and academic programs not included.)

(4) The above time is based on Beijing Time (GMT+8).

(5) For the Foreign Membership of the Soil Science Society of China, please visit this link: http://en.csss.org.cn/become_a_member.

Participant Type

Please choose your attendance type

Registration Types

Student	\$400
Participants from low, lower-middle income countries	\$400
Farmer	\$400
SSSC Member	\$570
Standard	\$600

Companion

One Companion	\$300
Two Companion	\$600
Three Companion	\$900
Four Companion	\$1200
Five Companion	\$1500

Gala Dinner

One Gala Dinner Ticket	\$100
Two Gala Dinner Tickets	\$200
Three Gala Dinner Tickets	\$300
Four Gala Dinner Tickets	\$400
Five Gala Dinner Tickets	\$500

All fields marked with a red asterisk (*) are mandatory.

How to submit an abstract?

第23届世界土壤学大会
The 23rd World Congress of Soil Science

Step 5: Payment can be made via online payment or bank transfer.

Payment Method

Online Payment

Offline Payment

Bank transfer

If an official invoice is required to facilitate the payment process, please contact us at wcss2026.reg@issas.ac.cn.

Onsite Payment

Early-bird registration rate is available until March 7, 2026. You may return to this page at a later time to complete your payment.

Submit

How to submit an abstract?

第23届世界土壤学大会
The 23rd World Congress of Soil Science

Step 6: The page will redirect, indicating successful registration. You may proceed to the next step for abstract submission. Information can be amended at a later stage if needed.

Online Payment

Method of payment:

Please confirm the above order information and click the button for online payment. After payment is completed, please save the payment voucher. The payment progress can be checked in the personal center.

Your registration has been successful. Please check the information.ypay ,Please click "Submit the payment" for payment!

Charge Details:

Description	Total
Student	\$400

Invoice Balance : **\$400**

You have successfully registered. Please complete the payment before March 7, 2026 with the early-bird rate.

[Submit the payment](#) [Return to modify](#)

Bank transfer

Method of payment:

To open an account name: Soil Science Society of China
The bank account: 4301 0108 0900 1064 640
bank: Industrial and Commercial Bank of China, Jiangsu Xuanwu Branch

Bank transferpay

Charge Details:

Description	Total
Student	400

Invoice Balance : **\$400**

[Invoice\(print\)](#)

You have successfully registered. Please complete the payment before March 7, 2026 with the early-bird rate. [Return to modify](#)

Submit the offline remittance

Upload the remittance voucher

Please upload the credentials.

What is the remittance certificate?

When you complete the transfer at the bank counter, you will receive a voucher/note as the remittance certificate.

Schematic diagram remittance certificate at counter

How to upload the counter remittance certificate?

- 1.Print the remittance voucher/note and take a picture;
- 2.Click on the left side of the page and select the picture of remittance certificate to upload.

第23届世界土壤学大会
The 23rd World Congress of Soil Science

Step 7: In Abstract Submission, click “Contribute” .

Center	Submission Guidelines														
Registration															
Abstract submission	Submission start time: 2025-07-07 Submission deadline: 2025-11-30 23:59:59 Abstract word limit: 3000 Characters Submission Guidelines: Before submission, please prepare the following items: (1) Abstract Title (2) Keywords: 2-5 keywords (3) Presenter Information: Name, affiliation and email (for conference notifications) (4) Main Text (Download template here.) Important Notes (1) Each delegate may submit more than one abstract. For topics, please visit the link: https://www.23wcsc.org.cn/topic/index.html (2) Submitted abstracts should be publicly accessible. No confidential content is permitted. The presenter bears full responsibility for compliance with institutional confidentiality policies. (3) Final submission appears under [Abstract List]. Draft is not listed; retrieve it via [Load Draft] on the submission page. (4) Abstract must be written in English. (5) Presenters of accepted abstracts must complete payment by 7 May 2026, or the abstract will be withdrawn by the Organizing Committee.

Soil and the Shared Future for Humanity

How to submit an abstract?

第23届世界土壤学大会
The 23rd World Congress of Soil Science

Step 11: After submission, a confirmation email sent by 逸云智会<service@yiyum.cn> (congress registration portal provider) will be sent to your registered email address.

Please note that the confirmation email may be marked as spam or placed in your junk folder, so please check it carefully. If you do not receive the confirmation email, please contact us at: wcss2026@issas.ac.cn.

Abstract topics

第23届世界土壤学大会
The 23rd World Congress of Soil Science

See detailed information on the congress website.

101 Soil Morphology and Micromorphology

- 101001 Advances in Soil Morphology and Micromorphology: unveiling the earth's hidden resource
- 101002 Micromorphology as a Tool for Understanding the Evolution of Soils and Environments in Natural and Human-Impacted Landscapes

102 Soil Geography/Soil Genetic Classification and Soil Geography

- 102001 Magnetic enhancement of the soils in urban/industrial areas: Sources and properties of anthropogenic magnetic particles and its influences on soil genesis
- 102002 The Third National Soil Survey in China: Key Technologies and Result Applications
- 102003 Soil structure and ecosystem functioning in Earth's Critical Zone
- 102004 Open discussion session on observed phenomena in soils and their underlying pedogenic processes: bring and share photos of your macro- and micromorphological observations and join the discussion on debated phenomena!

104 Soil Classification

- 104001 The Role Soil Classification in the Shared Future of Humanity

105 Pedometrics

- 105001 Advancing pedometrics

106 Paleopedology

- 106001 Paleosols as Memory: Transdisciplinary Insights into Changing Paleoenvironments across Geological Timescales
- 106002 Traditional and Novel Concepts, Approaches, and Methods in Studying the Past Genesis of Soils and Soil-Sedimentary Systems

Soil and the Shared Future for Humanity

Abstract topics

第23届世界土壤学大会
The 23rd World Congress of Soil Science

107 Permafrost Affected Soils

- 107001 Permafrost-affected soils of the changing high-latitude and high-altitude environments

108 Digital Soil Mapping

- 108001 Advances in Remote Sensing for Soil Property Mapping
- 108002 Democratizing Digital Soil Mapping: Innovative Technologies for Global Soil Services and Solutions
- 108003 Leveraging Site and Spatial data for Soil monitoring
- 108004 Operational Digital Soil Mapping: fitness for use of DSM products: pitfalls to avoid and way forward
- 108005 Digital Soil Mapping and Assessment: Advances, Applications, and Future Directions

110 Proximal Soil Sensing/Soil Remote Sensing and Information

- 110001 Advances in soil health monitoring with proximal sensing
- 110002 Soil Organic Carbon Accounting Using Proximal Sensing: Advancing Sustainability Across Agricultural and Natural Ecosystems
- 110003 Soil Spectroscopy: A Global Solution for Sustainable Soil Management and Food Security

112 Universal Soil Classification

- 112001 Advances in Numerical Soil Classification

113 World Reference Base

- 113001 Towards improved criteria, diagnostics, and classification of human-constructed and human-transformed soils in the World Reference Base (WRB) system

Soil and the Shared Future for Humanity

Abstract topics

第23届世界土壤学大会
The 23rd World Congress of Soil Science

201 Soil Physics

- 201001 Beyond Plant Available Water – New Insights on Soil Water Accessibility
- 201002 Linking Physical and Hydrological Processes with Soil Health and Functionality in Terrestrial Ecosystems

202 Soil Chemistry

- 202001 Physicochemical and Biological Processes of Chemicals in Soils
- 202002 Advances in soil carbon dynamics across scales: from molecules to ecosystems

203 Soil Biology/Soil Biology and Biochemistry/Soil Virus

- 203001 Diversity and Function of Soil Viromes
- 203002 Roles of extracellular polymeric substances in biogeochemical cycling and soil health
- 203003 Soil Biodiversity and Soil Health: Interactions, Indicators, and Innovative Approaches
- 203004 Soil Biogeochemistry in Wetlands: Foundations for Restoration and Climate Resilience
- 203005 Soil Microbiomes – Importance For Climate Resilient Future, Degraded Lands Restoration And Plant Health Control
- 203006 The rise and fall of microbial diversity in soil: drivers, consequences, and implications

204 Soil Mineralogy

- 204001 Geophagic clays as a focus of interdisciplinary research
- 204002 Soil mineralogy: current state and perspectives

Soil and the Shared Future for Humanity

Abstract topics

第23届世界土壤学大会
The 23rd World Congress of Soil Science

205 Soil Chemical, Physical and Biological Interfacial Reactions

- 205001 Life, agriculture, and productive systems in arctic and other cold regions
- 205002 Hydromorphic and Submerged Soils: Geography, Processes, Classification

206 Hydropedology

- 206001 Hydropedology: Addressing real-world problems through interdisciplinary science

207 International Soil Modeling Consortium

- 207001 Modelling soil processes from ped to global scale
- 207002 Soil Erosion Modelling: Global Alliance

Soil and the Shared Future for Humanity

Abstract topics

第23届世界土壤学大会
The 23rd World Congress of Soil Science

301 Soil Evaluation and Land Use Planning

- 301001 Better management of organic agro-waste in response to various global environmental issues
- 301002 Soil evaluation and land use planning for sustaining productivity

302 Soil and Water Conservation/Soil Erosion and Soil-water Conservation

- 302001 Changing the drainage target, balancing water control and environmental effects?
- 302002 Managing water for managing soil health?
- 302003 Occurrence, mechanisms, and behavior of soil water repellency
- 302004 Rethinking the planning of soil and water management under climate change
- 302005 Soil erosion and conservation
- 302006 Water Flow and Solute Transport in the Soil-Plant System

303 Soil Fertility and Plant Nutrition/Soil-plant Nutrition/Soil Fertility and Fertilizer

- 303001 Advances in Soil Fertility Management Through the Utilization of Organic Waste
- 303002 Global and regional trends in cropland nutrient balance and use efficiency
- 303003 Global Phosphorus Stewardship: Innovations and Strategies for Sustainable Soil Fertility
- 303004 Novel fertilizer research and industrial development

Abstract topics

第23届世界土壤学大会
The 23rd World Congress of Soil Science

- 303005 Plant nitrogen utilization: from cell to field
- 303006 Rhizobiont for high nutrient use efficiency
- 303007 Sustainable Phosphorus use in Agroecosystems: New Approaches to Optimizing Nutrient Management and Ecosystem Functionality

304 Soil Engineering and Technology/Soil Engineering/Soil Analysis Technique

- 304001 Advancing Soil Microbial Insights via Single-Cell Technologies
- 304002 Application of advanced instrumental analysis techniques in soil science
- 304003 Can enhanced rock weathering capture and store atmospheric CO₂? Its expectations and limitations.
- 304004 Engineering technology system for efficient quality improvement of obstructed soil
- 304005 Survey-Based Soil Spectral Library for Agricultural Management
- 304006 Nanosensors for Soil Quality Monitoring: Design, Mechanisms and Field Applications

305 Soil Degradation Control, Remediation and Reclamation/Soil Remediation/Environmental Micro-Plastics

- 305001 Deciphering the Soil-Pollutant Nexus: Biogeochemical Frontiers for Soil Health and Sustainable Ecosystems
- 305002 Enhanced In Situ Bioremediation for Contaminated Sites

Soil and the Shared Future for Humanity

Abstract topics

第23届世界土壤学大会
The 23rd World Congress of Soil Science

- 305003 Integrated remediation and utilization strategies for degraded soils in mined lands
- 305004 Investigation and Assessment of PFAS-Impacted Agricultural Lands and Food Crops
- 305005 Micro- and Nano-plastics in the Soil: From Pollution to Solution
- 305006 New pollutants in soils
- 305007 Organohalide biogeochemical cycling and remediation in soil
- 305008 Selenium-Heavy Metal Interactions: Biogeochemical Cycling, Health Risks, and Sustainable Remediation Strategies
- 305009 Soil Pollution by Heavy Metals and Risk Control
- 305010 Soil Composites: Synthesis, Interface Behavior and Environmental Remediation Applications

306 Salt-affected Soils

- 306001 Global status of salt-affected soils: the outcomes of the FAO's report
- 306002 Soil salinity management strategies for sustainable agriculture from plot to regional scales

307 Soils of Urban, Industrial, Traffic, Mining and Military Areas (SUITMA)

- 307001 Past, present, and future of SUITMA (soils of urban, industrial, traffic, mining and military areas)

308 Acid Sulphate Soils

- 308001 Health Maintenance and Sustainable Management of Acidified Soils
- 308002 Wetland soils, acid sulfate soils and sulfidic materials

Abstract topics

第23届世界土壤学大会
The 23rd World Congress of Soil Science

309 Forest Soils

- 309001 Forest and Grassland Soil Functions and Sustainable Utilization under Global Change
- 309002 Forest Soil Management: Processes, Challenges, and Sustainable Production
- 309003 Rubber-based agroforestry ecosystems enhance soil enzyme activity but exacerbate microbial nutrient limitations
- 309004 Soil microbial diversity and functions in carbon and nitrogen cycling in response to tree diversity, wildfires and climate change
- 309005 Soil organic matters dynamics and nutrient cycling in global forests under climate change
- 309006 Gaining food from barren mountains: Synergistic mechanisms driven by woody oil crops for non-arable land restoration and sustainable use

310 Paddy Soils

- 310001 Restoring Soil Health for Sustainable Rice Cultivation: Pollution Remediation, Microbial Innovations, and Resilient Paddy Systems in East Asia
- 310002 Soil health-Water-GHG Nexus for sustainable crop production in paddy soils
- 310003 The synergistic effects of lime, NPK, and manure application on rice productivity in the soils of the Old Himalayan Piedmont Plain
- 310004 Understanding paddy soil microbiomes for food and climate security

Abstract topics

第23届世界土壤学大会
The 23rd World Congress of Soil Science

401 Soils and the Environment/Soil Environment/Soil Ecology

- 401001 Peatlands in a changing world
- 401002 Soil food web structure and function under global change
- 403003 Unveiling the hidden world: Biodiversity and ecological function of soil fauna

402 Soils, Food Security, and Human Health

- 402001 Conservation and restoration of black soils in agro-ecosystems
- 402002 Soil, Global Change, Food Security and Human Health
- 402003 Soil Management and Food Sovereignty through Collective Strategies
- 402004 Sustainable Management and Restoration of Black Soils: Global Experiences and Actions
- 402005 Soil Security and Policy: Foundations for a Sustainable Future

403 Soils and Land Use Change

- 403001 Healthy Soil Uses for Humankind
- 403002 Land Use and Management Effects on Soil Health and Environmental quality

404 Soil Education and Public Awareness/Soil Science Education

- 404001 Accelerating equity in Soil Sciences to strengthen the IUSS
- 404002 Share our standpoints of soil teaching and learning at school, university and civil society for the future development of better soil education system.

Soil and the Shared Future for Humanity

Abstract topics

第23届世界土壤学大会
The 23rd World Congress of Soil Science

- 404003 Soil and Sensibility: Revisiting Oral and Written Traditions in South Asia

405 History, Philosophy, and Sociology of Soil Science

- 405001 Fostering International Collaboration in Soil Science
- 405002 Language of Soil – Mapping Concepts across Interdisciplinary Fields of Soils Research
- 405003 Soil literacy for all: transforming global awareness into engagement and impact through collective action
- 405004 Women in Soil Science: Closing Gaps and Strengthening Collaboration

406 Young and Early Career Scientists/Youth

- 406001 Bridging young and senior soil scientists to foster future generations of soil advocacy
- 406002 Future of Soil Science: Next 20 years and beyond

407 Nitrogen

- 407001 Soil nitrogen processes, consequences, and regulations

408 Soil Health

- 408001 Harmonization of Soil Health Monitoring: Scientific, Institutional, and Societal Perspectives
- 408002 Nature-Based Solutions for Soil Health and Sustainable Crop Production
- 408003 Soil Management Practices on Soil Health in Plastic Greenhouses

Soil and the Shared Future for Humanity

Abstract topics

第23届世界土壤学大会
The 23rd World Congress of Soil Science

409 Carbon Neutrality and Global Change

- 409001 Advances in Best Management Practices for Achieving Climate-Smart Agriculture
- 409002 Advancing Soil Organic Carbon Science for Sustainable Land Management
- 409003 Climate change and soil microbial control carbon sequestration
- 409004 Evolution of Soil Organic Matter: Impacts of Climate Change and Land Use Change
- 409005 Next-Generation Pyrogenic-C Systems: From Molecular Mechanisms to Planetary-Scale Impacts
- 409006 One carbon metabolism in terrestrial ecosystems
- 409007 Physical, chemical, and biological drivers for soil greenhouse gas fluxes
- 409008 Soil Carbon Dynamics and Impacts of Land Use and Management
- 409009 Soil carbon fluxes for climate and soil health
- 409010 Soil microbial life and death: impacts on soil organic carbon dynamics under global change
- 409011 Soil organic matter transformation, stabilization and storage
- 409012 The challenge and opportunity for precise assessment and prediction of soil carbon sequestration and storage across spatial and temporal scales
- 409013 Soil Organic Carbon Monitoring and Management: Integrating Science, Technology, and Practice for Sustainable Ecosystems

Soil and the Shared Future for Humanity

Abstract topics

第23届世界土壤学大会
The 23rd World Congress of Soil Science

501 Soil Science Edition and Term Verification/Journals

- 501001 A 35-Year Journey of Pedosphere: Promoting Soil Sciences across the World
- 501002 Opportunities and challenges for the development of soil science journals

502 Cultural Patterns of Soil Understanding/Soil Science Popularization

- 502001 Cultural Wisdom, Global Soil Futures: Advancing Soil Security Through Connectivity
- 502002 From Dirt to Destiny: Communicating Soil Science for Global Sustainability and Cultural Understanding
- 502003 Sculpted by stones, enriched by soils: Global trends on Historic Agricultural Terraces. First step towards building a research community

503 AI

- 503001 AI and Innovative Technologies for Research, Mapping, and Sustainable Management of Salt-Affected Soils
- 503002 The Application of Machine Learning to Soil Morphology and Micromorphology
- 503003 The digital age in the study, evaluation and teaching of soil sciences
- 503004 Web-based digital twins and decision support systems for soil sustainability in land planning and management

Soil and the Shared Future for Humanity

Abstract topics

第23届世界土壤学大会
The 23rd World Congress of Soil Science

504 Entrepreneurship and New Farmers

- 504001 Soil technology applications and entrepreneurship
- 504002 Climate-friendly and sustainable agricultural practices with plateau-specific characteristics and multi-dimensional symbiosis in Yunnan under climate change
- 504003 New Farmers: A Vital Force in Promoting Rural Sustainability and Agricultural Diversity
- 504004 Safeguard the Land: Chinese Community-Supported Agriculture Network with Participatory Guarantee System Practices

505 Special Session

- 505001 Sino-French Symposium on Soil Health Innovation - Driving Sustainable Agriculture Through Science and Collaboration
